EDUCATION

IIT Kharagpur
M.Tech · Telecom Systems Engg · 2016

B.Tech · Electronics & Communication Engg

CLIENTS

PepsiCo · MetLife · JSW · NedBank · J&J · ADP · Iffco Tokio General Insurance · C3 · Dow Chemical · E.J. Gallo · Mercedes-Benz

TECHNICAL SKILLS

GENERATIVE AI

GPT-4o LLaMA 3.1/3.3 BERT T5
LangChain LangGraph RAG GraphRAG
Prompt Engineering Fine-tuning RLHF
PEFT / LoRA / QLoRA DSPy Vector DB
Multi-Agent Systems
Automated Prompt Generation

ML & DEEP LEARNING

TensorFlow PyTorch CNN ResNet
YOLO R-CNN Mask R-CNN CRNN RNN
LSTM Transfer Learning MLflow

NLP

Text Classification NER
Hugging Face StarCoder CodeLLaMA
Watson Speech-to-Text
Watson Visual Recognition

LANGUAGES

Python C++ SQL Gremlin Cypher

PYTHON ECOSYSTEM

FastAPI Pandas OpenCV NetworkX
Bokeh

DATABASES

PostgreSQL MongoDB CosmosDB Neo4j
Redis MySQL SQLite

CLOUD & DEVOPS

Azure ML Azure Databricks
Azure AI Studio AKS Azure AI Search
Azure Form Recognizer
Azure Functions
AWS (EC2 · S3 · EKS · Fargate · SageMaker · Bedrock)
Docker Kubernetes Terraform
Azure DevOps CI/CD OpenTelemetry
WebSockets

ABOUT

Data Scientist at IBM since August 2016, with core expertise in image processing, NLP, and deep learning. Proficient in TensorFlow and Microsoft Azure. Hands-on in Generative AI — fine-tuning LLMs (GPT-4o, LLaMA), prompt engineering, multi-agent systems (LangGraph/LangChain), and RAG pipelines. Experienced in distributed microservices, graph databases, and real-time WebSocket communication. Led Data Scientist teams across multiple engagements; MLOps for model deployment and lifecycle management. 2nd runner-up, Azure Insighthon 2.0 hackathon.

EXPERIENCE

CockpitGPT
May 2024 – Mar 2026

DATA SCIENTIST – AI ENGINEER

Enterprise BI platform enabling the FP&A team to query complex financial data through natural language. Built on a distributed microservices architecture (FastAPI) with a 16-step query pipeline and a LangGraph multi-agent system (Router, Data, Formatter, Narrative, Dimensional Mapping agents). Data layer: Azure Databricks, Cosmos DB/Gremlin for knowledge graph, MongoDB, Redis. Real-time WebSocket streaming, AKS deployment, Azure DevOps CI/CD, OpenTelemetry observability.

C3
Jun 2018 – Dec 2018

DATA SCIENTIST

Digitised and categorised aviation training documents — PDFs, image files, and videos — using OCR and NLP. Segmented videos into topic-based sections, detected on-screen text via OCR, and integrated Watson Speech-to-Text (customised for German) alongside Google Speech API for multilingual transcription. Automated the full topic-classification pipeline and improved NLP module accuracy.

Automated Car Insurance Claim Assessment
Feb 2019 – May 2019

DATA SCIENTIST

Computer vision system for automated motor insurance claim assessment. Classified car models from photographs, identified outer body parts and their colours, and detected damage types to determine repair-vs-replace decisions. Trained classification models from scratch and applied transfer learning on Mask R-CNN (pre-trained on COCO) for object detection. Deployed as a GPU-backed REST API.

Export Automation — Digitization of Letter of Credit
Oct 2021 – Oct 2022

DATA SCIENTIST / DEVOPS ENGINEER

Automated document preparation for steel export — commercial invoices, bills of lading, mill test certificates, and more — by extracting structured data from Letter of Credit (LC) documents issued by banks. Built the orchestrator, integrated multiple ML models for image cleaning and document classification, and managed deployment and source code.

CERTIFICATIONS

IBM Generative & Agentic AI Expert — Data Scientist
